Portrait:

DIOSNA Dierks & Söhne was founded in 1885. With an export range of more than 70 %, DIOSNA is one of the leading manufacturers of kneading and mixing technology.

Two divisions form the main support for the company:

a) Machines for the food processing industry

Together with DIOSNA Mixers for the baking trade, the company also manufactures mixing plants for industrial baking companies, lifting and discharging stations and mixers, blenders for catering, meat-processing companies and other firms of the food processing industry.

b) Machines for the chemical, pharmaceutical and plastics processing industries

Universal and special mixers, granulators, dryers (VAC), fluid bed equipment, coating plants, mixing and processing plants.

DIOSNA is represented with own sales offices in Russia and Indonesia and disposes of world-wide distribution and service networks.
