Portrait hannoverimpuls

//

Portrait:

hannoverimpuls is Hanover city's and Hanover region's company for economic development. Since its inception 2003, the company has facilitated foundation, settlement and growth of companies using a unique process chain. It focusses on five industries: Automotive, information and communication technology, life sciences, optic technologies and production technique. Competitions (Plug & Work, Wachstumsimpuls [growth incentive]), and start-up training courses (Summer and Winter School) as well as joint projects (LZH Laser Akademie [laser academy]) are instruments for economic development. 2,400 newly founded enterprises and 5,500 new jobs, since April 2003, are proof for its successful business model and the above average growth and future potential for the branches.

Sector:

automotive, information and communication technology, life sciences, optic technologies and production technique.
